

COURSE OUTLINE

(1) GENERAL

SCHOOL	SOCIAL SCIENCES		
ACADEMIC UNIT	DEPARTMENT OF CULTURAL TECHNOLOGY AND COMMUNICATION		
LEVEL OF STUDIES	UNDERGRADUATE		
COURSE CODE	PLR 100	SEMESTER	1 st
COURSE TITLE	INTRODUCTION TO PROGRAMMING		
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>		WEEKLY TEACHING HOURS	CREDITS
Lectures and Laboratories		4	6
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>			
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	Core Course/General Background/Skills Development		
PREREQUISITE COURSES:	None		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	Greek		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	Yes		
COURSE WEBSITE (URL)	https://eclass.aegean.gr/courses/131184/		

(2) LEARNING OUTCOMES

<p>Learning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> ● <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> ● <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> ● <i>Guidelines for writing Learning Outcomes</i>
<p>After the completion of the specific course students will be able to:</p> <ul style="list-style-type: none"> ● Define and explain the basic principles of procedural, structured programming and the ways for applying them to real problems. ● Understand the importance of algorithmic logic and how it contributes on solving simple and complex algorithmic problems. ● Understand the syntactical rules of Python commands and their functionality. ● Understand and use Python environments and also to develop, debug and execute Python programs. ● Create Python programs by applying the principles of procedural programming to implement solutions to algorithmic problems.
<p>General Competences</p> <p><i>Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?</i></p> <p><i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i> <i>Project planning and management</i> <i>Respect for difference and multiculturalism</i></p>

<i>Adapting to new situations</i>	<i>Respect for the natural environment</i>
<i>Decision-making</i>	<i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i>
<i>Working independently</i>	<i>Criticism and self-criticism</i>
<i>Team work</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an international environment</i>
<i>Working in an interdisciplinary environment</i>	<i>Others...</i>
<i>Production of new research ideas</i>

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Working in an interdisciplinary environment
- Production of free, creative and inductive thinking
- Transfer of know-how in other environments

(3) SYLLABUS

General principles for program design, algorithms, flow charts, techniques for designing algorithms, solving algorithmic problems. Introduction to Programming. The Python programming language. Program elements: variables, constants, expressions, basic data types, operators. Data Input/Output. Decision control commands. Repeat structures, arrays, subprograms.

Lectures	
1.	Introduction to basic principles of structured programming
2.	Introduction to Algorithms and Python. Python Programming environment
3.	Variables and Data types
4.	Numerical and Alphanumerical operators
5.	Simple Structure
6.	Conditions
7.	While Loops
8.	For Loops
9.	Data Structures – One dimension list
10.	Data Structures – Multi dimensions lists
11.	Sorting Lists
12.	Searching in Lists
13.	Functions

(4) TEACHING and LEARNING METHODS - EVALUATION

<p style="text-align: center;">DELIVERY <i>Face-to-face, Distance learning, etc.</i></p>	Face-to-face																								
<p style="text-align: center;">USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i></p>	Use of open source software for laboratory education. Use ICT in teaching and communication with students.																								
<p style="text-align: center;">TEACHING METHODS <i>The manner and methods of teaching are described in detail.</i> <i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i></p> <p><i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i></p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Activity</th> <th style="text-align: center;">Semester workload</th> </tr> </thead> <tbody> <tr> <td>Lectures</td> <td style="text-align: center;">13 *2 hours = 26 hours</td> </tr> <tr> <td>Lectures' study</td> <td style="text-align: center;">13*3 hours = 39 hours</td> </tr> <tr> <td>Laboratory Practice</td> <td style="text-align: center;">13*2 hours = 26 hours</td> </tr> <tr> <td>Laboratory Preparation</td> <td style="text-align: center;">13*3 hours = 39 hours</td> </tr> <tr> <td>Tutorials</td> <td style="text-align: center;">13*2 hours = 26 hours</td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td>Course total</td> <td style="text-align: center;">156 hours</td> </tr> </tbody> </table>	Activity	Semester workload	Lectures	13 *2 hours = 26 hours	Lectures' study	13*3 hours = 39 hours	Laboratory Practice	13*2 hours = 26 hours	Laboratory Preparation	13*3 hours = 39 hours	Tutorials	13*2 hours = 26 hours											Course total	156 hours
Activity	Semester workload																								
Lectures	13 *2 hours = 26 hours																								
Lectures' study	13*3 hours = 39 hours																								
Laboratory Practice	13*2 hours = 26 hours																								
Laboratory Preparation	13*3 hours = 39 hours																								
Tutorials	13*2 hours = 26 hours																								
Course total	156 hours																								
<p style="text-align: center;">STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure</i></p> <p><i>Language of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other</i></p> <p><i>Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i></p>	<p>The final evaluation is accomplished with a written exam at the end of the semester. Students are examined with open notes.</p> <p>Students are familiar with the evaluation criteria during the initial course lecture at the beginning of the semester and are stored throughout the semester in the course's area in eclass (eclass.aegean.gr).</p>
