

COURSE OUTLINE

(1) GENERAL

SCHOOL	Social Sciences		
ACADEMIC UNIT	Cultural Technology and Communication		
LEVEL OF STUDIES	Undergraduate		
COURSE CODE	MATH 601	SEMESTER	6
COURSE TITLE	ADVANCED ARTIFICIAL INTELLIGENCE		
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>	WEEKLY TEACHING HOURS	CREDITS	
Lectures	1	2	
Laboratories	2	3	
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>	3	5	
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	Core Course/General Background		
PREREQUISITE COURSES:	None		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	Greek		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	Yes		
COURSE WEBSITE (URL)	https://eclass.aegean.gr/courses/131363/		

(2) LEARNING OUTCOMES

<p>Learning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> ● <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> ● <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> ● <i>Guidelines for writing Learning Outcomes</i> 								
<p>The students will be in the position to:</p> <ul style="list-style-type: none"> ● Understand the basic principles of machine learning ● Get familiar with the supervised and unsupervised learning ● Implement basic techniques for artificial neural network training ● Understand the basic structure of fuzzy systems ● Understand and implement fuzzy system training algorithms ● Comprehend and implement evolutionary computation algorithms 								
<p>General Competences</p> <p><i>Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?</i></p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%; border: none;"><i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i></td> <td style="width: 50%; border: none;"><i>Project planning and management</i></td> </tr> <tr> <td style="border: none;"><i>Adapting to new situations</i></td> <td style="border: none;"><i>Respect for difference and multiculturalism</i></td> </tr> <tr> <td style="border: none;"><i>Decision-making</i></td> <td style="border: none;"><i>Respect for the natural environment</i></td> </tr> <tr> <td style="border: none;"></td> <td style="border: none;"><i>Showing social, professional and ethical responsibility and</i></td> </tr> </table>	<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>	<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>	<i>Decision-making</i>	<i>Respect for the natural environment</i>		<i>Showing social, professional and ethical responsibility and</i>
<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>							
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>							
<i>Decision-making</i>	<i>Respect for the natural environment</i>							
	<i>Showing social, professional and ethical responsibility and</i>							

<i>Working independently</i>	<i>sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

- Search for, analysis and synthesis of data and information, with the use of the necessary technology
- Adapting to new situations
- Decision-making
- Working independently
- Team work
- Project planning and management
- Production of free, creative and inductive thinking
- Working in an interdisciplinary environment

(3) SYLLABUS

Basic concepts of machine learning. Supervised machine learning, unsupervised machine learning. Basic structure and function of the artificial neuron. Basic structures and training of feedforward neural networks. The back-propagation training algorithm. Basic structure and training of fuzzy systems. Evolutionary computation algorithms such as swarm intelligence algorithms.

The course is structured as follows:

1. Introduction
2. Structure single artificial neuron and neural network
3. Training rules of a neural network: what are they.
4. Delta rule
5. Feedforward neural networks
6. Gradient Descent algorithm
7. Back-propagation algorithm
8. Fuzzy logic and fuzzy sets
9. Fuzzy systems and their training
10. Evolutionary algorithms: basic structure
11. Swarm Intelligence algorithms
12. Cybernetics
13. Summary

(4) TEACHING and LEARNING METHODS - EVALUATION

<p style="text-align: center;">DELIVERY <i>Face-to-face, Distance learning, etc.</i></p>	Face-to-face																											
<p style="text-align: center;">USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i></p>	Use of open source software such as OCTAVE and Anaconda based Python.																											
<p style="text-align: center;">TEACHING METHODS <i>The manner and methods of teaching are described in detail.</i> <i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i></p> <p><i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i></p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;"><i>Activity</i></th> <th style="text-align: center;"><i>Semester workload</i></th> </tr> </thead> <tbody> <tr> <td>Lectures</td> <td style="text-align: center;">13 *1 hours =13 hours</td> </tr> <tr> <td>Lectures' study</td> <td style="text-align: center;">13*5 hours = 65 hours</td> </tr> <tr> <td>Laboratory Practice</td> <td style="text-align: center;">13*2 = 26 hours</td> </tr> <tr> <td>Laboratory Preparation and semester assignment</td> <td style="text-align: center;">33 hours</td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td>Course total</td> <td style="text-align: center;">137 hours</td> </tr> </tbody> </table>		<i>Activity</i>	<i>Semester workload</i>	Lectures	13 *1 hours =13 hours	Lectures' study	13*5 hours = 65 hours	Laboratory Practice	13*2 = 26 hours	Laboratory Preparation and semester assignment	33 hours															Course total	137 hours
<i>Activity</i>	<i>Semester workload</i>																											
Lectures	13 *1 hours =13 hours																											
Lectures' study	13*5 hours = 65 hours																											
Laboratory Practice	13*2 = 26 hours																											
Laboratory Preparation and semester assignment	33 hours																											
Course total	137 hours																											
<p style="text-align: center;">STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure</i></p> <p><i>Language of evaluation, methods of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other</i></p> <p><i>Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i></p>	<p>The final examination is the main tool to evaluate student's performance. In this exam the student gets involved in solving complex programming problems.</p> <p>During semester, each student is also invited to carry out optional homework tests. If the student accepts the invitation, these tests will be positively considered in student's final evaluation.</p> <p>The evaluation criteria are clearly announced during the first lecture and in the e-class web site.</p>
