

COURSE OUTLINE

(1) GENERAL

SCHOOL	School of Social Sciences		
ACADEMIC UNIT	Department of Cultural Technology and Communication		
LEVEL OF STUDIES	Undergraduate		
COURSE CODE	POL227	SEMESTER	8 th
COURSE TITLE	Cultural documentation and social space		
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>		WEEKLY TEACHING HOURS	CREDITS
		3	5
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>			
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	<i>skills development</i>		
PREREQUISITE COURSES:	No		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	Greek		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	YES		
COURSE WEBSITE (URL)	http://www.ct.aegean.gr/propt-spoudes/test		

(2) LEARNING OUTCOMES

<p>Learning outcomes</p> <p><i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i> 								
<p>Within the framework of this course students will receive knowledge in order to be able to:</p> <ul style="list-style-type: none"> • know basic concepts, approaches and interpretations of social space. • understand the interaction between culture and social space. • understand the space as a palimpsest of history and cultures. • understand the dialectical relationship between human societies and space. • understand use methods and techniques of cultural documentation of space. • be familiar with the basic techniques of Geographical Information Systems. • know how to visualize cultural data through thematic mapping. • compose research data and produce metadata. 								
<p>General Competences</p> <p><i>Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?</i></p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%; border: none;"><i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i></td> <td style="width: 50%; border: none;"><i>Project planning and management</i></td> </tr> <tr> <td style="border: none;"><i>Adapting to new situations</i></td> <td style="border: none;"><i>Respect for difference and multiculturalism</i></td> </tr> <tr> <td style="border: none;"><i>Decision-making</i></td> <td style="border: none;"><i>Respect for the natural environment</i></td> </tr> <tr> <td style="border: none;"></td> <td style="border: none;"><i>Showing social, professional and ethical responsibility and</i></td> </tr> </table>	<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>	<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>	<i>Decision-making</i>	<i>Respect for the natural environment</i>		<i>Showing social, professional and ethical responsibility and</i>
<i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i>	<i>Project planning and management</i>							
<i>Adapting to new situations</i>	<i>Respect for difference and multiculturalism</i>							
<i>Decision-making</i>	<i>Respect for the natural environment</i>							
	<i>Showing social, professional and ethical responsibility and</i>							

<i>Working independently</i>	<i>sensitivity to gender issues</i>
<i>Team work</i>	<i>Criticism and self-criticism</i>
<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>	<i>.....</i>
<i>Production of new research ideas</i>	<i>Others...</i>
	<i>.....</i>
<ul style="list-style-type: none"> • <i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i> • <i>Decision-making</i> • <i>Team work</i> • <i>Working in an interdisciplinary environment</i> • <i>Production of new research ideas</i> • <i>Project planning and management</i> 	

(3) SYLLABUS

The course deals theoretically with the concept of social space both in its real and virtual dimensions. It also analyses the concept of topos as it is formed in the context of cultural theory. Yet it focuses on spatial dimensions of culture as they are formed through social and historical processes. Examples of spatial palimpsests where historical, social and cultural data is embodied are presented. Finally the course emphasises on methods of cultural documentation (archival and bibliographic research, oral testimonies) and the use of technological tools (Geographical Information Systems) for the organisation of spatial data bases.

The course is divided into thirteen thematic lectures. Part of the teaching material is posted on the course's digital platform. During the lectures students' participation is encouraged for the better understanding of the theoretical concepts and the technological applications. In addition, students undertake team assignments on cultural documentation (collecting and organizing data, thematic mapping).

(4) TEACHING and LEARNING METHODS - EVALUATION

DELIVERY <i>Face-to-face, Distance learning, etc.</i>	<i>Face-to-face, class lectures</i>	
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i>	Use of optical media (PC and projector) in lectures, use of electronic classroom platform for communication with students and laboratory training for the use of Geographical Information Systems.	
TEACHING METHODS <i>The manner and methods of teaching are described in detail. Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc. The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i>	Activity	Semester workload
	Lectures	13*3=39 h
	Lectures' study	13*3=39 h
	Study for the final exam	13*2= 26h
	Practice and team assignments	40 h
	Course total	144 h
STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure Language of evaluation, methods of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i>	The Students' evaluation takes place with a) written exams at the end of the semester (50%) and b) practice and team assignments delivered at the end of the semester (50%).
